RS#PingPong
FOLDING&STATIONARY

by RAFAEL RODRIGUEZ

The RS#PingPong is a new ping-pong table concept. Stationary or folding. You choose.

Until now, most of the folding ping-pong tables in the market have been strictly functional, with design taking a back seat. The RS#PingPong restores design to its rightful place. It combines the functionality of a folding ping-pong table with the signature design of RS Barcelona products. Because design needn't be incompatible with functionality and playability.

The 2 versions of the RS#PingPong (folding or stationary) boast standard ping-pong table measurements (108x60x30 in) cm, while its surface, design and structure provide total playability, stability and toughness. Just like a professional ping-pong table.
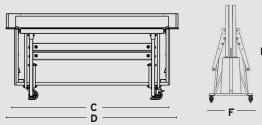

"With the RS#PingPong Folding version "I haven't got space" is no longer an excuse."
